

## Winter Paper Snowflake Template

Cut out the circle, fold in half 3 times, then cut along the orange dashed shapes. Unfold to reveal your unique snowflake! Each one comes out different. Decorate your windows while your furnace keeps you warm.

## How to Make Your Snowflake

1. Cut out the circle along the solid border
2. Fold in half along the horizontal dashed line
3. Fold in half again along the vertical line
4. Fold diagonally one more time
5. Cut along the orange dashed shapes (or make your own!)
6. Unfold carefully and enjoy!

✂ CUT OUT CIRCLE

### Winter Thermostat

Set to 68°F when home, 60-62°F when sleeping or away. Save ~3% per degree lowered.

### Seal Drafts

Check windows and doors for cold air leaks. Weatherstripping is cheap and easy to install.

### CO Detectors

Test your carbon monoxide detectors monthly. Replace batteries twice per year.

### Furnace Check

Schedule a fall tune-up. A well-maintained furnace runs safer and more efficiently all winter.

### Filter Change

Replace your furnace filter every 1-3 months. A clean filter improves airflow and reduces strain.
